

## i1Pro 3 Plus

For Imaging

### Color Profiling Without Limitations.

With the ability to measure larger print materials with optional polarization, the i1Pro 3 Plus can reduce color variability on many substrates, including vinyl, fabrics, transparent films, specialty photo papers, corrugated, and back-lit, for the highest level of color accuracy and repeatability. The i1Pro 3 Plus also supports transmission profiling, and can be partnered with i1iO for automated transmission profiling of backlit film and materials used in signage.

#### Materially Diverse.

- Enables profiling of a broad range of material substrates and surfaces with a new larger 8mm aperture:
  - **Industrial materials:** corrugated, glass, metal, wood, and vinyl
  - **Packaging and Printing:** thin films, labels, cardboard, and plastics
  - **Textiles:** organic, synthetic, weaves, and sublimation sheets
  - **Ceramics:** ceramic tiles and laminates
  - **Photo:** fine art, high gloss, canvas, and lacquered papers
  - **Monitors and Displays:** supports super bright displays up to 5000 nits
  - **Backlit:** films and textiles
- Reduces color measurement variability with optional polarization capabilities, helping to correct for unique material qualities
- Supports emission scanning for backlit textiles, films, and other materials used in displays and signage

#### Automation and Calibration: Simplified.

- Achieves correct calibration and creates ICC profiles with the addition of new targets and standards
- Simultaneously measures M0, M1, and M2 in a single pass to account for optical brighteners
- Offers a new LED illuminant, improving device reliability and provides four measurement conditions

#### Transmissive Profiling Capabilities.

- Supports automated transmission profiling, with i1iO, for backlit film and materials used in signage
- Provides more accurate and consistent profiles than created by hand
- Reduces waste and saves money and rework

# i1Pro 3 Plus for Imaging

## Integration with i1Pro 3 Products

The i1iO enables hands-free chart reading for automated color profiling. Combined with the i1Pro 3 & i1Pro 3 Plus, the i1iO optimizes automated file creation allowing for a reduction of wasted time and materials during production. The i1iO is also designed to accommodate a variety of unique print and packaging substrates, including thin films, labels, cardboard, textiles, and plastics. Truly providing you with the utmost in profiling capabilities.

## Service Support & Warranty

X-Rite's color analysis and measurement solutions are engineered and manufactured to the most rigorous quality standards. These standards are backed by comprehensive global service, superior phone and web support, and preventative maintenance options to optimize your long-term investment. We have developed service support and warranty plans that are unique to your organization's specific products and needs.

Learn more by reviewing our service offerings on our website at: [www.xrite.com/page/service-warranty](http://www.xrite.com/page/service-warranty).

Still unsure of what you need? Contact us directly at: [servicesupport@xrite.com](mailto:servicesupport@xrite.com)
