

x-rite  Learning
Center

As the global leader in the art and science of color education, X-Rite Learning Center offers tailored learning paths, resources, and offerings that equip you with the knowledge and training necessary to master the color measurement process from start to finish.

Our team of Color Scientists, Solution Architects, Project Managers, Developers, and Industry Experts will educate and train your team to successfully implement or enhance your color workflow.

Custom Color and Workflow Training with Industry-Recognized Professionals

Better manage your workflow and increase savings with X-Rite Custom Color Training. With onsite and remote options available, our Color Experts can provide tailored training sessions to help you understand the role of color in your industry, integrate solutions in your workflow, and manage production so you can receive the maximum return from your color technology.

Efficient and Effective

Whether your color needs require a one-hour session, half-day session, or multi-day series, our color training programs are personalized to help you achieve your specific color goals. It doesn't matter if you're a novice or a color expert—our training will give you the actionable skills they need to improve the quality of your product and process.

Remote Training Topics Include:

- ⊕ Setup and installation
- ⊕ Basic user training
- ⊕ Software upgrade and data transfer

Onsite Training Topics Include:

- ⊕ Advanced user or team training
- ⊕ Workflow training
- ⊕ Fundamentals of color training

Your Color Expert Will:

①

Consult with you to identify your needs and determine the best type of training and schedule.

②

Design a custom training session about the topics that matter to you.

③

Lead you through the training and answer your questions.

Convenient Custom Consultations

Our Color Experts will come to your facility to audit your operations, consult with you on how to improve them, and train your staff on how to get the most out of your color workflow. We encourage you to invite your color stakeholders to either a remote or in-person discussion so they can share your team's goals and challenges.

What We Do

We will come to your business to offer in-depth color training and support, saving you money and time so your team can perform at their best. Our Color Experts observe and report on your current color quality processes, discuss your desired outcomes, and help you define the best tools and methods for achieving instrumental and visual color acceptability.

Areas of Support

- ⊕ Identify the areas of waste and opportunity in color measurement processes
- ⊕ Aid in the verification of instruments and lighting conditions
- ⊕ Help with writing Standard Operating Procedures
- ⊕ Provide guidance on color specification
- ⊕ Train on instrument best practices
- ⊕ Perform proper color vision testing

How It Works:

① Our Color Experts will define possible audits, services, and training to help your team achieve your objectives.

② Our team will deliver the proposed agenda, timeline, and cost for the project for your approval.

③ Our Color Experts will manage the delivery of the services to your team on the agreed timeline.

④ Future consulting and audits can be planned as part of a continuing improvement program.

Online and In Person Classes and Seminars

Designed to help you gain the knowledge you need to optimize your color measurement and design workflow, our classes and seminars give you the chance to learn from industry-recognized Color Experts about the fundamentals of color, how to work with X-Rite devices and software, and more.

Offered both online and in person at locations around the world, our courses are designed for anyone who communicates, designs, evaluates, or approves color in any industry.

Seminars

Our industry-recognized Color Experts will teach you the fundamentals, best practices, and color knowledge you need to efficiently manage your color workflow.

Online Learning

We offer a variety of self-paced training courses that feature video presentations from our Color Experts, software demos, and interactive learning exercises.

Featured Seminars

Visit xrite.com/learning-center to see a full list of upcoming and online seminars.

Fundamentals of Color and Appearance Online

From the physics of color to lighting, spectrophotometers, and color data—in this interactive course, you will learn how to measure, view, and communicate color. Watch the modules at your own pace, follow along with a digital course book, and complete interactive learning activities.

Additional Features

- + 24/7 access to the entire course to work on at your own pace
- + Access to chat and discussion posts from fellow attendees and our Color Experts
- + Interactive learning activities to test your knowledge and learning
- + Certificate of completion with a passing score of 80%

“This course sharpened my knowledge of color and put a lot of what I knew together!”

FOCA Online Course Participant

Fundamentals of Instrumentation and QC Training Online

Once you've completed the FOCA course, put your color theory knowledge into practice with our next course offering. This five-hour interactive FIQC course uses an innovative blend of videos and software simulations to teach the best quality control practices to streamline your color workflow.

Additional Features

- + 24/7 access to the entire course to work on at your own pace
- + One-hour live virtual session with an instructor to ask follow-up questions
- + Software simulations to practice your knowledge and learning
- + Certificate of completion with a passing score of 80%

“The interactive simulations were a really cool way to engage with the software.”
