

Introducing – the NEW 331C Transmission Densitometer!

331C

The new 331C Transmission Densitometer is portable and compact yet has the same accuracy and repeatability as larger countertop units, measuring densities up to 4.0 D

New features include:

- New NiHyD battery that delivers greater than 2,000 measurements per battery charge, a 333% improvement over the current 331
- Takes only 1 hour to fully charge from a discharged state, compared to 14 hours with the old battery
- Uses standard 12VDC battery charger and is considerably more power efficient! The charger is only active when the battery requires charging
- New LED light indicates instrument charging status
- New "Sleep" mode powers down the instrument when not in use to conserve battery power
- Easy to read touch pad
- EnergyStar compliant

Purchase a new 331C during X-Rite's 2010 Promotion for \$1,063, a savings of \$187 off the list price of \$1,250.

Place your orders now for shipment by June 30, 2010!
