

“We were using a previous X-Rite spectrophotometer in our paint department, which performed pretty well. But we have been absolutely delighted with the new MetaVue™, an imaging non-contact spectrophotometer, because of its outstanding accuracy and consistency in measurement.”

—Chad Ayers, CO-OWNER FOR A HARDWARE STORE IN ALLENDALE, MI

▲ The W90 Series combines everything an outstanding paint department requires to match paint to even the most difficult or unusual sample on the first try.

## W90 Series

### Overview

The W90 Series includes the next-generation MetaVue™ non-contact imaging spectrophotometer, the first of its kind to offer superior measurement performance, delivering consistent measurements for precise paint formulation. This instrument provides paint associates the ability to easily respond to a range of different types of customer samples and accurately measure them, building confidence behind the paint counter, and increasing customer loyalty.

### Choose the best package for your business:

- The W90 Series is the top-of-the-line configuration for retail paint departments, expressly designed for point of sale applications with improved color searches and matching.
- MetaVue's advanced smart spot image feature compensates for texture and other appearance effects on samples such as carpet, vinyl or fabric.
- MetaVue ensures accuracy on a variety of measurements, both small and odd-shaped, by capturing the exact spot desired with the use of the on-screen digital targeting function.
- MetaVue delivers the ultimate in versatility with an adjustable aperture size, ranging from 2mm to 12mm, and the ability to measure exact dominant colors from multi-colored samples.
- ColorDesigner PLUS expedites and refines the paint selection process, eliminating needless formulation errors, and it connects to any paint dispenser system.

Measure desired portion of the sample with precision

Identify multiple colors in a sample

Capture exact spot desired with on-screen digital targeting
