

ColorCert ScoreCard Server

Analyze. Uncover. Unlock.

ColorCert Scorecard Server is designed for Printers & Converters who need an at-a-glance view of production quality across their print and packaging organization. Redesigned from the ground up, the ColorCert Scorecard Server will help you save time and money by leveraging a consolidated, web-based, customizable dashboard to communicate color performance. Most importantly, implementing ColorCert Scorecard Server helps communicate quality in a single-number score that is relevant and easy to understand.

Greater Visibility

- Gain visibility to color performance across your presses and production facilities.
- Monitor color throughout your organization.
- Manage multiple sites on a single scorecard system.
- Increase color accuracy and production efficiency.

Unbiased Quality Management

- Compare color quality between print and packaging component runs.
- Eliminate manual post-processing and reporting saves time and reduces error.

Configurable Dashboards and Reports

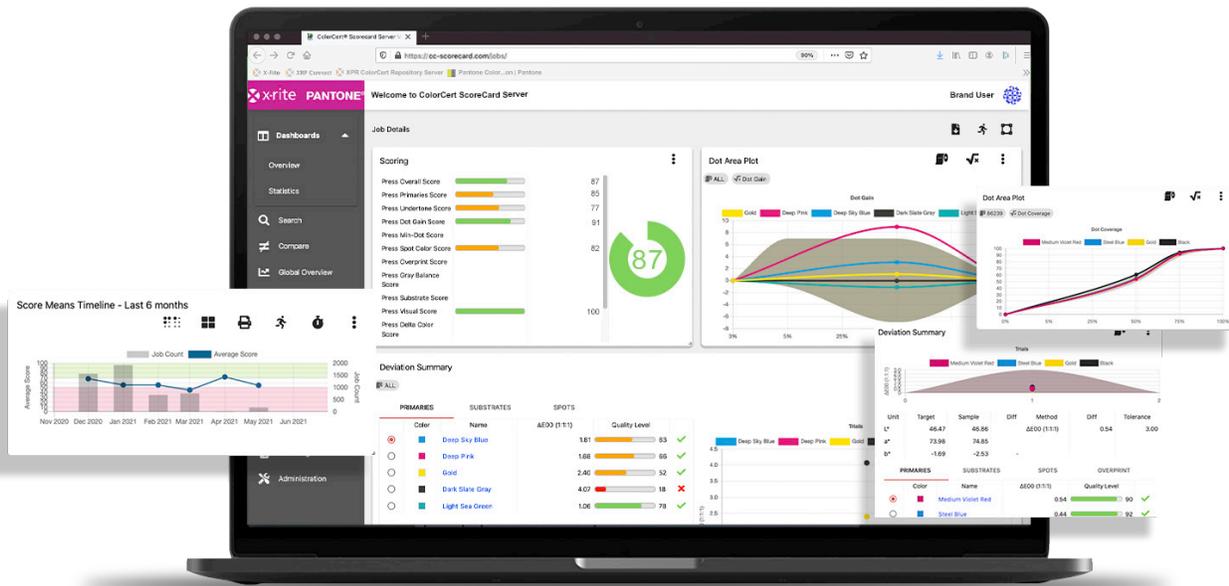

- View data in one, consolidated, customizable, web-based location.
- Tailor reporting to include information that is most valuable to your business and decision-making.
- Segment and review color performance by customer.
- Analyze relevant data over time and production locations to uncover trends and unlock insights.

Differentiate Yourself

- Easily define and communicate your color accuracy.
- Provide easy to understand single number scoring to convey production quality.
- Safeguard against complaints and cost.

ColorCert ScoreCard Server Printers & Converters

ColorCert Scorecard Server enables you to:

See what is happening across your packaging print operations as it happens.

Take control of color performance and drive improvement.

Act on production data to make informed decisions.

More from the X-Rite Toolkit

ColorCert Repository

The ColorCert Repository Server is a secure, cloud-based portal to manage and deploy digital assets based on user type, location, brand, workflow stage, or other parameters.

ColorCert QA

ColorCert QA is a pressroom and ink room quality assurance solution that provides actionable guidance to manage color standards, improving color performance and reducing make ready time and waste.

ColorCert Desktop Tools

ColorCert Desktop Tools are modular solutions to create accurate color specifications and control processes at multiple points throughout the packaging workflow.

PantoneLIVE

With PantoneLIVE Production, leverage pure spectral values for spot colors throughout the production process to ensure accurate and repeatable color regardless of substrate, printing technology or ink types used.

Brand Color Services

Our Brand Color Services are customized to fit your needs, schedule, and budget. Contact us to discover the many options we have available, from seminars, classroom, and on-site training to eLearning modules and custom online help.
