

# Digital Finish Capture

## From Physical Samples to High Quality Digital Imagery

X-Rite Pantone's Digital Finish Capture, turns your material samples into high resolution digital images. We have all the necessary hardware, software, and expertise to achieve the highest quality images at an affordable price with fast turnaround. Images are delivered in a variety of color-corrected formats to meet a wide range of needs. With Digital Finish Capture, we accurately render a variety of materials: fabric, leather, mesh, wood, veneer, laminates, glass, plastic, and more.

X-Rite's Color Experts come from a commercial photography background, have vast experience with digital image retouching, and benefit from X-Rite's depth of color knowledge. Most importantly, they specialize in the complete color management workflow, from display to print, ensuring each image accurately represents the original sample.

### The Process

1. Gather your physical materials
2. Ship them to X-Rite
3. Experts will photograph or scan your materials
4. Choose from a variety of image formats from high resolution crop to seamless tileable images
5. Deliverables are sent by downloadable link
6. Samples are returned upon request

### Benefits

- Obtain accurate representation of samples, regardless of the pattern, size, and repeat
- Receive specific file formats with images at a variety of resolutions to fit size and pixel requirements
- Ensure consistency throughout the workflow, from rendering to print and web
- Ability to work with any size repeats and material patterns
