

Onsite Training

Custom Color Training Comes to You

Custom Onsite Training

With Custom Onsite Training, an X-Rite Color Expert will come to your site to address your learning objectives and provide hands-on training using your equipment.

Efficient and Effective

Color errors can cause significant issues including excessive waste, rework, and customer dissatisfaction. Whether your organization is experiencing color issues or would simply like to increase your team's color knowledge, X-Rite Customized Onsite Training is the answer. An X-Rite Color Expert will come to your business to provide hands-on training using your equipment and address your learning objectives, industry, equipment, and workflow application.

After training, novices and color experts alike will have actionable ideas to troubleshoot issues, reduce costs, and improve overall quality and throughput.

Sample Objectives for Custom Onsite Training

1. Color theory
2. Individual color vision assessment
3. How to use hardware & software
4. Tips for efficient color control
